

## (Supplemental Rear Axle Assembly instructions)

Complete the following before completing the rear axle Installation section of your ASSEMBLY INSTRUCTIONS.

1. Locate rear axle, chain, sprocket, and key.

2. If key was removed from axle, install now and ensure key is fully down in the keyway groove. Tap with a rubber hammer if needed.

3. Slide sprocket onto axle in direction shown. Slide completely over the key.

4. If needed, lightly tighten the locking screw to keep sprocket from sliding off axle during assembly.
